

# HEADQUARTER RELOCATIONS TO TEXAS

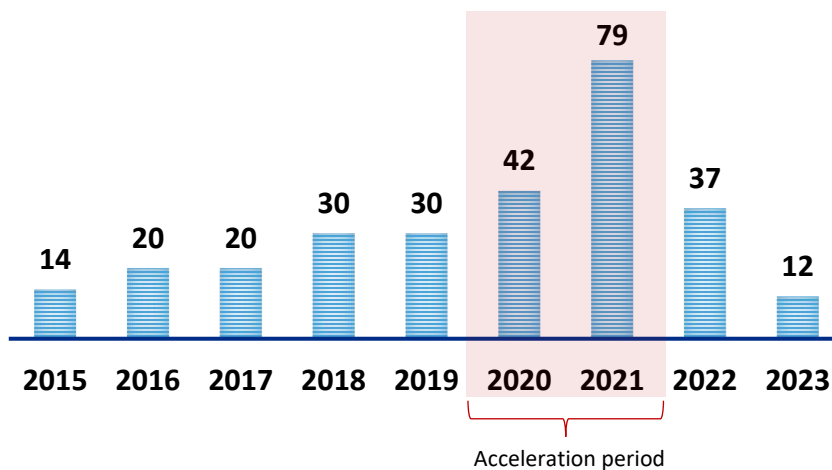

Texas Economic Development & Tourism | Office of Governor Greg Abbott

Increasingly known as the headquarters of headquarters, Texas offers an environment where corporate operations across all industries can thrive. The Lone Star State champions a world-class economic landscape, attracting businesses of all sizes—from Fortune 500 headquarters to small- and medium-sized businesses—thanks to a unique combination of competitive business advantages that no other state can claim. Fueled by one of the lowest business operating costs in the nation, in combination with a reasonable regulatory environment, lower cost of living and an exceptional quality of life, Texas is a top state for corporate headquarters relocations.

After seeing a spike in headquarters relocations in 2020 and 2021, total relocations in 2022 returned to above normal levels and continue to grow in 2023. See the data below for more on corporate relocations.
